About

ABOUT THIS DASHBOARD

Purpose:

Helps HR leaders, business strategists, and economists understand how recessions impact jobs, salaries, and hiring

Key Questions Answered:

- Which industries lose the most jobs?
- Are large or small companies more vulnerable?
- How do salary cuts compare across sectors?
- Which countries recover fastest?
- What is net workforce change before vs. after recession?

Data Coverage:

Years: 2008, 2009, 2020, 2021
Countries: USA, UK, Germany, India
Industries: IT, Healthcare, Finance, Retail, Manufacturing
Company Sizes: Small, Medium, Large

Key Metrics:

- Job Change % = (After Jobs – Before Jobs) / Before Jobs
- Salary Change % = (After Salary – Before Salary) / Before Salary
- Layoffs = Number of employees laid off
- Hiring Rate = New hires per 100 employees
- Unemployment Rate = % of labor force unemployed

Top Insights from Data:

- IT is most recession-resilient (–11.4% job change)
- Healthcare is most vulnerable (–16.2% job change)
- Large companies face highest job losses (–17.0%)
- 2009 was the worst year (–15.5% job change)
- Higher hiring rates reduce net job loss
